The Child-Friendly Business Awards salute companies that support their parent-employees in nurturing the growth of their children and balancing the demands of home and work life. We believe companies should strive to have a child-friendly work culture which could include:

- Employees working non-traditional hours due to family needs
- Providing private space for new moms to breastfeed/pump
- Allowing flexibility in returning to work after the birth of a child
- Offering an on-site child care center or contributing to child care costs
- Allowing employees to bring children to work, if needed
